This program aims to raise awareness about the importance of environmental conservation and tree planting among students. The program involves gifting every student in the department a tree sapling along with good wishes on their birthday. By doing so, the institution intends to instill a sense of responsibility and ownership in the students towards the environment. Each student is responsible for planting and nurturing the sapling in their home surroundings, thereby promoting conservation and preservation on an individual level.

The program is set to run for a year, starting from 1st May 2023 to 1st May 2024, with active participation from the students in the Electronics and Telecommunication Department. The program is supported by the joint efforts of the Social Club and the Electronics and Telecommunication Students' Association (ETSA), ensuring a collaborative approach towards achieving the goals of environmental sustainability.
